# Working as a Consulting Occupational Therapist offers many benefits:

## Group Practice

Group Practice setting and diversity of work and referral sources provides a degree of security within a setting that allows **independence** and **autonomy**.

## Best Practices

The Progressive Rehab group is a **collaborative** work environment where practices are continuously evaluated.

## Opportunity

You have the opportunity to **develop** your skills and expertise, and to **shape** your practice in terms of volume and type of work.

## Professional Development

**Unlimited** opportunities for professional development. Work along side our experienced clinicians, including a number of **Matheson instructors**.

**OrionHealth provides the infrastructure – facility, administrative and accounting support – to allow you to focus on the clinical side of your practice.**

We work with you to support your transition both clinically and financially – Our belief is that each new member will strengthen and diversify our practice.

# Primary Areas of Practice

## Community Rehabilitation

Work with individuals with orthopaedic, soft tissue and neurological injuries as well as those with mental health concerns;

- Provide services from initial hospital discharge planning, through recovery and reactivation, community integration and return to work/productivity
- Assess and prescribe for equipment and accessibility issues
- Provide ergonomic assessment and recommendations
- Develop compensatory strategies and self management
- Develop programming supported by rehab assistants
- Provide long terms services to catastrophically injured clients with life long needs

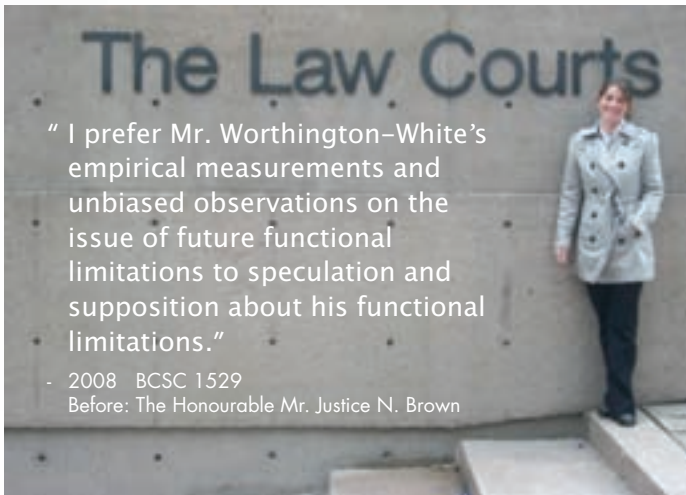

## Return to Work Services

- Facilitate return to work through job demands analysis, job site visits and functional screening
- Work with workers, employers, unions, occupational health staff, other treating therapists and insurers to **develop and implement** graduated return to work plans that address the physical and psychosocial barriers for the worker
- Visit hundreds of job sites and **gain real life experience** of a wide range of jobs; develop your negotiation skills

## Medical Legal Services

Use your **clinical skills** along with your skills in **objective assessment**, critical thinking and analysis to provide **expert opinion** regarding work capacity and cost of future care needs to the courts to assist in evaluating claims.

## Functional Capacity Evaluation

- Use a **systematic** approach to objectively evaluate functional abilities and limitations
- Use your **therapeutic skills** to engage the client to maximize participation
- Apply your **clinical thinking and analysis** to interpret the results and formulate your opinion

## Consulting at Progressive Requires:

- Two years of occupational therapy experience
- Organization and time management skills
- Mediation, conflict resolution and negotiation skills
- Ability to work independently and collaboratively
- Critical thinking skills
- Confidence to make decisions and provide opinions
- A passion for continuous learning and best practice

**Our Contractors said that the top 3 reasons they were attracted to and continued with Progressive Rehab - OrionHealth were:**

1. The other Clinicians who work there
2. Opportunity for professional development
3. Compensation and work structure

OT Consultants - Ride to Conquer Cancer
